*Each hotel is like one star in the night sky, all brilliant stars make up a starry sky.*

List up your software's killer feature.

---

1 *Effective sales analysis and build strong sales strategy.*

(Explain the detail)

Customers can booking, change booking or cancel booking online, then purchase and pay online. Besides that, receptionist can deal with no booking visitor, so that all sales information can be store in this system. Sales manager can analyze the history sales amount and decide a discount for some rooms (or all rooms) to promote sales. For example, base on the sales corresponding period of last year report, if the hotel locals in a tourist city which visitor flow may be in periodicity.

2 *Quickly find each hotel's weakness point.*

Customers can make comments on both facility and service in the system. Every comment should be replied by hotel manager: valued suggestions will be adopted, problems will be traced until solved. Waiters are responsible for updating rooms status to keep all rooms in good condition. If there is any problem in facilities, tickets will be opened by waiter and then tracked by hotel manager.

3 *Make strategic decisions more reliably and more efficiently*

Accountant can do work more efficiently since some calculation could be automatically finished.

Group manager can easily do strategic sales analyze in this product to decide if there is necessary to enlarge business for some hotels, or to scale up businesses in some areas, or to kick off long-term promotional activities for some hotels...

Group manager can have an overview of all customer feedback on all hotels' service, which response market feedbacks to some extent.

You can write text, or draw picture for the description as much as you need.
